

The AI agent *that turns your data into decisions.*

It connects to your data, understands your context and answers in plain language.

WHY NIVII

Purpose-built for data analysis 80–90% of the core already built. Go-live in 12 weeks.	Works with messy data The Cleaner agent normalises before it queries. No clean-up project first.	Leaner on tokens 80% cheaper than ChatGPT at the same query volume.

CLIENTS

--	--	--	--	--

HOW IT WORKS

CLIENT CLOUD • 5 AGENTS
Anthropic • OpenAI • Gemini

CLEANER Cleans Sorts and normalises the data.	BOUNCER Checks Clears the request and the permission.	PLANNER Plans Builds an analysis plan.	DATARETR Queries Pulls the data from the systems.	BIZANLST Answers Writes the answer and the recommendation.
